UI/UX Designer

Career Goal:

I am a highly creative user interface / user experience designer, motivated, customer service oriented and highly organized with five years of experience working with web, graphics, social, and multimedia design technologies. My goal is to become associated with a company where I can utilize my skills to gain further experience while enhancing the company's productivity and reputation. My skills include UI/UX Design, web design, information architecture, web design, app design, mock-ups, wire-frames, prototypes and graphic design.

Summary:

- Identifying visual & business needs and presenting new ideas to solve problems in a fast-paced environment
- Have an eye for details and the user-centered design practices including usability goals, user personas, tasks and workflow of a product or service
- Experienced at driving a design project from start-to- finish. My process includes identifying the product requirements; meeting with clients, product owner, stakeholders and QA, gather research, create use cases from the research and requirements, create task flows, wire-framing and mockup design, prototyping, and usability testing.
- Experienced creating and revising information architecture, content maps and wire frame diagrams
- Participating in product exploration and design, as well as graphic, web, email design, mobile application, visual identity and info-graphic design
- Hands- on experience as a interaction/visual designer
- Working Knowledge with HTML, CSS & JS
- Experienced using content management systems such as WordPress and IBM WebSphere
- Collaborated with marketing, product designers, UX designers, engineers & front-end developers in an agile environment
- Building prototypes, wireframes, mockups
- Proficient with Adobe creative cloud, Illustrator, Photoshop, Sketch and Invision
- Responsive design for desktop, tablet, mobile
- Experience creating print design, flyers, brochure, business cards

Education:

Bachelor of Science, Industrial High Technology Product Design, spring 2012. San Francisco State University, San Francisco, CA

Design Skills:

- Image resizing and cropping

UI/UX designer, Avnet INC, San Jose, CA

Oct 2016- May 2017

Description: As UX and Web Designer at Avnet I worked with a large team to migrate over 1500 web pages in IBM WebSphere. Avnet's rebrand took place over a period of 1 year, collaborating with marketing, development and design teams. I had a hybrid role as both a web and UX designer. As UX designer I designed page layouts and brand guidelines for the rebranding of Avnet's company website. Once the design was established web designers, including myself, populated the layouts created by the UX team with content using HTML and CSS inside of IBM WebSphere. Commerce for Avnet products was a complex system updated to manage products along with their descriptions and images.

- The new re-branding and web design helped increase online conversion rate & revenue from 1% to 3% or generated +\$200 Million in revenue
- Experience working side-by-side with developers, UX designers, and web designers to implement Avnet's website and application
- Daily stand ups with the team and UX directors on deviations based on input during the development process
- Experience with research and user testing of designs and prototypes
- Created graphics, Images, Banner ads, Assets for Avnet's website
- Develop Wireframes, functional prototypes and collaborate on user experience
- Using industry standard UX Process to create new designs

- Design and develop web pages, using HTML, CSS, Java Script for IBM portals
- Design and publish technical articles for Avnet website
- Old Website migration to a new website and transferring big data
