UI/UX designer, Avnet INC, San Jose, CA

Oct 2016- May 2017

Avnet's rebrand took place over a period of 1 year, collaborating with marketing, development and design teams. I had a hybrid role as both a UI/UX designer. Designed page layouts and brand guidelines for the rebranding of Avnet's company website. Once the design was established web designers, including myself, populated the website layouts created by the UX designers with content using HTML and CSS inside of IBM WebSphere. Commerce for Avnet products was a complicated system updated to manage products along with their descriptions and images.

- The new re-branding and web design helped increase online conversion rate & revenue from 1% to 3% or generated +\$200 Million in revenue
- Experience working side-by-side with developers, UX designers, and web designers to implement Avnet's website and application
- Daily standups with the team and UX directors on deviations based on input during the development process
- Experience with research and user testing of designs and prototypes
- Created graphics, images, banner ads, assets for Avnet's website
- Develop wireframes, functional prototypes and collaborate on user experience
- Using industry standard UX process to create new designs
- Design and develop web pages, using HTML, CSS, JavaScript for IBM portals
- Design and publish technical articles for Avnet website. +600 pages
- Old website migration to a new website and transferring big data
- Provided UX design solution including sketches, low and high fidelity mockups and wireframes
- Provided web architecture, created landing pages, dashboards and navigation system
