June 2018 – Nov 2018

Description: As a senior UX designer, I am working in the consumer division of the creative department, which supports all BabyCenter content and mobile development work with the product and development teams. I'm experienced working with iOS and Android platforms, responsive web, social and content-rich products. I've created wireframes, interactions, comps, prototypes using UX design tools such as Sketch, InVision, Adobe CC, etc. BabyCenter LLC is an online media company based in San Francisco and is a member of the Johnson & Johnson family of companies. They are the #1 pregnancy and parenting digital destination, reaching more than 45 million parents a month in every corner of the globe through its 11 countries and supports nine languages. In the US, 8 out of 10 moms online use BabyCenter each month.

- Produced multiple UX design concepts to satisfy a set of given business requirements based on provided design concepts
- Participated in design and brainstorming sessions
- Worked collaboratively with the cross-functional team in identifying the best design approach
- Produced everything from detailed wireframes and user flow to the high-quality design approach
- Using industry standard UX process to create new designs
- Participated in usability tests, working with A/B tests, and collaborating with research and analytics team
- Identifying and creating functional requirements
- Help advocated user-centered design
- Worked in an agile scrum environment

Intercultural Institute of California - San Francisco, CA
UI/UX Designer

May 2017- July 2017

Description: The Intercultural Institute of California wanted a responsive new design for their marketing site. The responsive WordPress site is accessible across devices. Designed and developed web pages and build unique custom landing pages using HTML, CSS, and WordPress for content migration. Created web graphics, logo, managed image assets, image resizing and cropping using Adobe Creative Suite.

- Provided design strategy and art direction
- Website migration and transferring all data
- UI design, and choosing images, using Adobe Creative CC
- WordPress theme design
- Building custom landing pages using HTML, CSS
- Provided UI/UX design solutions, web flow, wireframes and sitemap

Avnet INC, San Jose, CA
UI/UX Designer

Oct 2016- May 2017

Description: As UX and Web Designer at Avnet, I worked with a large team to migrate over 1500 web pages in IBM WebSphere. Avnet's rebrand took place throughout one year, collaborating with marketing, development and design teams. I had a hybrid role as both a web and UX designer. As UX designer I designed page layouts and brand guidelines for the rebranding of Avnet's company website. Once the design was established web designers, including myself, populated the layouts created by our UX team with content using HTML and CSS inside of IBM WebSphere. Commerce for Avnet products was a complex system updated to manage products along with their descriptions and images.

- The new re-branding and web design helped increase online conversion rate & revenue from 1% to 3% or generated +\$200 Million in revenue
- Experience working side-by-side with developers, UX designers, and web designers to implement Avnet's website and application
- Daily standups with the team and UX directors on deviations based on input during the development process
- Experience with research and user testing of designs and prototypes
- Created graphics, images, banner ads, assets for Avnet's website
- Develop wireframes, functional prototypes and collaborate on user experience
- Using industry standard UX process to create new designs
- Design and develop web pages, using HTML, CSS, JavaScript for IBM portals
- Design and publish technical articles for Avnet website. +600 pages
- Old website migration to a new site and transferring large data
- Provided UX design solution, sketches, low and high fidelity mockups, and wireframes
- Provided web architecture, created landing pages, dashboards and navigation system

Freelance UI/UX designer, San Francisco, CA
UI/UX Designer

2012 – 2017

Description: As an independent contractor assisting clients with design needs for the past six years. Hands-on experience as a UX designer and produced multiple design concepts for responsive web and mobile apps to satisfy a set of given business requirements. Responsible for coordinating and delivering a variety of design solutions. Worked collaboratively with the cross-functional teams in an agile environment to identify the best design approaches. Knowledge of usability best-practices for web and mobile applications. Collaborating & iterating with Product, Marketing, Creative Director, and other designers throughout the design process. Created wireframes, storyboards, visual designs, prototypes, sitemaps, and screen flows to support new products and features. High proficiency in Sketch, Adobe CC, Illustrator, Photoshop, InDesign and other design tools.

- Identifying and translate concepts into customer journey maps, and personas
- Design and deliver wireframes, flows, mockups, storyboards, personas, prototypes for iOS, Android and web devices, and interfaces
- Using industry standard UX process to create new designs
- Bringing new ideas to the team and current design trends
- Participate in design brainstorming sessions, capturing client feedback
- Work with design guidelines and collaborate with team members to ensure consistency across designs
- Work collaboratively with developers to ensure successful implementation of a design specification
- Completing various visual design assignments including visual identity, infographics, personas, and UI guidelines
- Ability to come up with creative ideas about a given topic or situation to solve problems in a fast-paced environment
- Cooperating with research, engineering, and marketing teams
- Product usability testing
